

LMR[®]

195, 240, 400 & 600 Coaxial Cables,
Connectors and Hardware

LMR[®] Flexible Communications Coax

Times LMR cables are high performance broadband, flexible, low loss 50 Ohm coaxial communication cables designed for use in wireless applications such as:

- Private land mobile/2-way land mobile
- WiFi
- Cellular
- Satellite
- GPS
- RFID
- In-Building Communications
- M 2 M Networks
- Positive Train Control (PTC)
- Distributed Antenna Systems (DAS)
- Public Safety Networks
- SCADA/Telemetry
- Lo RA

Times LMR cables can be used virtually anywhere high performance coaxial cables are used, including:

- Internal component and equipment wiring
- Inter/intra cabinet jumpers
- Base station and antenna jumpers
- Tower and pole feeder runs
- In-building runs, including riser runs and air-handling plenums
- Rooftop installations
- Oil & Gas Fields
- Power Plants

A full range of LMR cables are available from LMR-100 (0.100") all the way up to LMR-1700-DB (1 1/4").

To see the complete line of LMR[®] cables please visit our website at www.timesmicrowave.com

In this catalog the focus is on standard LMR cables - specifically LMR-195, 240, 400 and 600 but there are many different types of LMR cables which are available, so you can always be certain that there is an LMR cable just right for your particular application. Besides standard LMR cable, Times offers:

- **LMR-FR:** Fire retardant cable for installation in building vertical risers or where fire retardancy is critical, both UL and CSA listed (CMR/CATVR).
- **LMR-LLPL:** cables are the most rugged and easiest to install plenum rated cables available, especially for difficult installs in older buildings. Cables are both UL and CSA listed (CMP/CATVP).
- **LMR-DB:** Watertight cables with an inert flooding compound injected in the braid to completely eliminate the possibility of any water migration with a 10 year warranty! The DB feature is optional on sizes 600 and smaller, and standard on sizes 900 and larger.
- **LMR Ultraflex:** Stranded center conductor and thermoplastic rubber jacket for maximum flexibility.
- **LMR-75:** These are 75 Ohm versions of the standard LMR cable for unsurpassed performance in broadband video and specialized RF applications.

Note:

For applications requiring low Passive Intermodulation (PIM), we recommend using one of our many low PIM cable constructions. See TFT[®], SPP[®], SPF[®], SPO[®], LMR-SW[®] and TCOM[®]. The standard LMR[®] construction is not suitable for low PIM applications.

Times Microwave Systems also offers a wide range of Times-Protect[®] RF Lightning Protection products. For information please refer to our website at www.timesmicrowave.com.

LMR[®] Flexible Communications Coax

In this catalog the focus is also on our well-known line of Advantage™ EZ-X series non-solder connectors.

All Advantage™ EZ-X series connectors have the following benefits:

- No braid trimming required
- Corrosion resistant
- Center pin contacts made from silver or gold plated beryllium copper
- Spring finger inner contacts
- Crimp style outer contacts
- Optimized connector retention

EZ connectors are the preferred choice for quick and reliable field installations.

Times offers an extensive portfolio of connectors covering numerous applications and is always adding new ones. For a complete listing, please refer to the Times website at www.timesmicrowave.com or contact Times directly.

A complete line of cable prep and connector installation tools is available so you never will be frustrated by not having the right tools - Times is your one-stop source.

Times furnishes a complete line of site installation hardware and accessories- everything you need to get you from the antenna to the equipment:

- Ground kits: Perfectly sized to each LMR cable, with never a chance of the ground strap being too tight (crushed cable), or too loose (poor grounding).
- Hangers: Snap-in, butterfly
- Hoisting grips
- Weatherproofing kits: Tape and cold shrink
- Entry ports and hardware

Times manufactures high quality LMR cable assemblies and performs 100% factory tests before shipment for insertion loss and VSWR. Many of Times' LMR distributors also supply LMR cable assemblies and provide excellent service, especially for quick delivery requirements.

Times has put together a full complement of "how-to" videos of many of the most popular Advantage™ -X Series EZ connectors as well as ground kits and other accessories. These videos are available both on the Times Microwave Website and YouTube. And if you ever need help on a job, just call us - our phone number is right on the cable.

Ideal for...

- Drop-in replacement for RG-58 and RG-142
- Cabinet interconnects
- Antenna Jumpers
- RFID

* Indicates that connector is not compatible with WSB-600 (3109-401)

Hardware and Installation Tools

Cable end flush cut tool

CCT-02
3192-165

Crimp tool - crimp handle,
crimp dies required

CT-U
3192-181

Crimp tool for LMR 600
connectors

CT-600
3192-170

Midspan strip tool for ground
strap attachment

GST-600A
3190-1051

Replacement blade kit for all
CST strip tools

RB-CST
3192-086

Tool kit for LMR-600 crimp/clamp
connectors (includes CCT-02, CST-
600, CT-600, Tool Pouch)

TK-600EZ
3190-1602

Weather seal strain relief boot (10
pk) for use with most popular
LMR-600-X series connectors

WSB-600
3109-401

Weather proof boot - LMR-600
Male IP boot suitable for type N,
TNC, BNC, 4310, 4195

IPB-600-NM
3109-417-4

Weather proof boot - LMR-600
Female IP boot suitable for type
N, TNC, BNC, 4310, 4195

IPB-600-NF
3109-417-5

Weather proof boot - LMR-600
Male IP boot right angle suit-
able for type N, TNC, BNC,
4310, 4195

IPB-600-NM-RA
3109-417-6

Lubricant for WSB and IPB boots

Rubber Slide
3109-424

Hoisting grip- laced type (each)

HG-600T

.610" hex dies

Y1720
3190-203

LMR[®]-600

About Times Microwave Systems

Times Microwave Systems, was founded in 1948 as the Times Wire and Cable Company. Today, the company specializes in the design and manufacture of high performance flexible, semi-flexible and semi-rigid coaxial cable, connectors and cable assemblies. With over 60 years of leadership in the design, development, and manufacture of coaxial products for defense microwave systems, Times Microwave Systems is the acknowledged leader, offering high tech solutions for today's most demanding applications.

Cable assemblies from Times Microwave Systems are used as interconnects for microwave transmitters, receivers, and antennas on airframes, missiles, ships, satellites, and ground based communications systems, and as leads for test and instrumentation applications.

As a highly specialized and technically focused company, Times Microwave Systems has been able to continually meet the challenges of specialty engineered transmission lines for both the military and commercial applications, drawing upon our:

- Thousands of unique cable and connector designs
- Exceptional RF and microwave design capability
- Precise material and process controls
- Unique in-house testing capabilities including RF shielding/leakage, vibration, moisture/vapor sealing, phase noise and flammability
- Years of MIL-T-81490, MIL-C-87104, and MIL-PRF-39012 experience
- ISO 9001 Certification

In 2010, Times Microwave Systems introduced its Times-Protect™ line of lightning and surge protection solutions to address the challenging needs of wireless systems in the 21st century.

With over 60 years of Times Microwave Systems aerospace cable and connector technology experience and unparalleled design expertise, Times Microwave Systems' staff of Field Applications Engineers can help to provide the right solution for your interconnect applications.
