News & Updates

Webinars

This webinar highlights the importance of knowing the differences between real and fake LMR® coaxial cables.

LMR Fakes and Clones Webinar
CABLES • CONNECTORS • TOOLS • ASSEMBLIES

This webinar details **how using an LMR® fake or clone cable can cost you more in the long term.** These lower-quality cables damage more easily than authentic LMR cables and are prone to faulty components. With the price of replacement materials and labor for re-installation, any initial savings are gone. Unfortunately, many companies advertise these fakes or clones as LMR replacements or alternatives.

WEBINAR
From Logo to Lawsuit:
Your Essential Guide to Trademarks

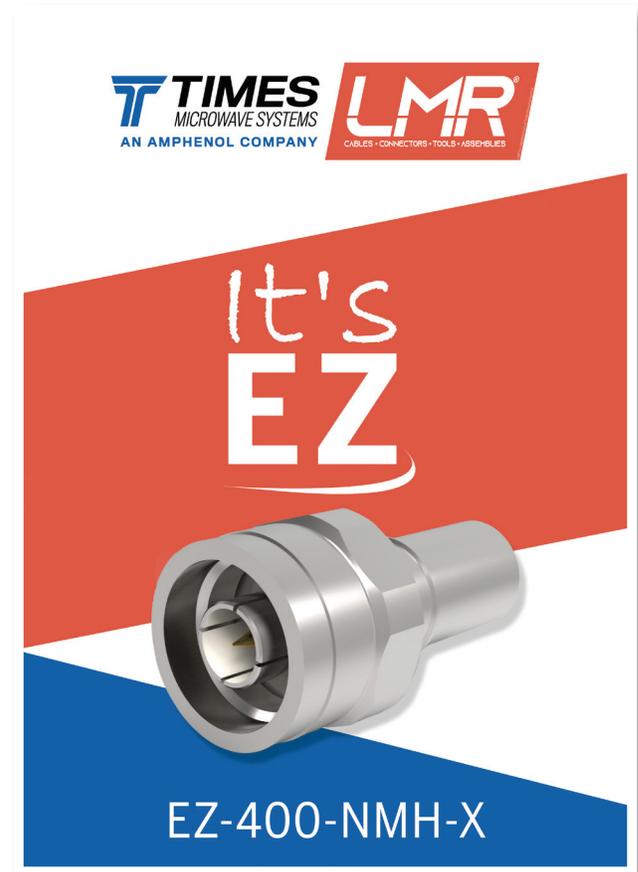

Scan to watch webinar

This webinar details the critical **importance of trademarks in maintaining product integrity, avoiding legal issues, and ensuring distinct brand recognition.** In today's market, ensuring you get genuine, high-quality coaxial cables and assemblies is crucial. Knowing how to spot potential trademark infringement helps customers avoid counterfeit cables. View the session for an in-depth look at trademark guidelines, infringement consequences, and the best practices for trademark usage.

LMR®, It's EZ!

The LMR® product line is not a complete assembly without the non-solder EZ style connectors from Times Microwave Systems
