

LMR[®]: Made in the USA

[LMR solutions](#) offer a complete range of highly flexible, rugged, low-loss braided cables, designed for quick and easy connector installation. Manufactured in the USA, LMR cables provide superior performance and reliability, outpacing traditional RG cables of similar size. With unmatched durability and signal integrity, LMR cables are the ideal choice for demanding applications that require the highest standards in both performance and quality.

Brand-New Cable Assembly Builder

Our new [Cable Assembly Builder](#) features a user-friendly interface with an interactive 3D viewer, empowering you to build your ideal cable assembly with ease. From selecting cables and connectors to specifying lengths, you can visualize every detail, download sales drawings and 3D files, and request a quote—all in one streamlined experience. Get the perfect solution for your application with just a few clicks!

Explore the Power of TFlex®

[TFlex](#) is a high-performance microwave cable that delivers low loss, low PIM, and excellent shielding—all in a flexible form. Designed as a drop-in replacement for semi-rigid coax, it offers comparable electrical performance without the hassle of complex 3D bends. With MIL-C-17 compliance, stable performance under flexing, and compatibility with standard semirigid connectors, TFlex is ideal for aerospace, defense, telecom, and test applications.

High-Density Multiport Connectors

High-density multiport connectors are revolutionizing RF systems for military and aerospace applications. These compact connectors reduce size, weight, and complexity while ensuring reliable performance.

Q: What connector options are available for plenum LMR-600 cables?

A: For plenum LMR-600 (LMR-600-LLPX-BK), we recommend the EZ-600-NMH-PL-X (3190-2963), which features a convenient non-solder pin. Pair it with the CST-600-PX (3192-265) tool for quick and easy installation.
