

## New Products, New REEL Times!

### Levitate™ Ultra-Lightweight Assemblies

In this episode of Reel Times, Levitate ultra-lightweight cable assemblies are introduced, highlighting how they reduce system weight without compromising RF performance for next-generation UAV and avionics applications.

### AccuPhase® RF Test Cable Assemblies

In this episode of Reel Times, AccuPhase test cable assemblies from Micro-Coax are introduced, highlighting their precision RF performance and consistent phase and amplitude stability in demanding lab and field environments.

## XtendedFlex® High-Flex Cables

In this episode of Reel Times, the XtendedFlex cable family is highlighted, showcasing its design for continuous flex and dynamic routing, with reliable RF performance in robotics, automation, and other motion-driven applications.

**Q: What applications is XtendedFlex used in?**

**A:** XtendedFlex is designed for continuous-flex applications such as industrial automation, robotic arms, warehouse and logistics robots, wearable systems, antenna masts, turret systems, and autonomous vehicles. It's engineered to withstand repeated motion and extreme flexing while maintaining reliable RF performance.
